

# MUNGANDA PRADEEPTHI

Hyderabad, India

9666867910| [pradeepthi2004@gmail.com](mailto:pradeepthi2004@gmail.com)| <https://www.linkedin.com/in/munganda-pradeepthi-a4b615255/>

## Objective

Motivated Computer Science graduate specializing in AI & ML with hands-on experience in mobile app development, data mining, and machine learning projects. Experienced in developing cross-platform applications using React Native and working with technologies such as Python, Java, Django, and MySQL. Currently working as a Lead STEM Engineer, mentoring students in robotics, AI, and coding while developing innovative learning solutions. Passionate about building intelligent systems and contributing to impactful technology-driven projects.

## Education

### MallaReddy University, Hyderabad, India

B.Tech in Computer Science and Engineering (AIML SPECIALIZATION) CGPA -9.07 (2021-2025)

### Narayana Junior college, Hyderabad, India

Higher Secondary Education – MPC GPA – 8.8 (2019 - 2021)

### My Life school, Hyderabad

Secondary Education - SSC GPA - 9.7 (2018 - 2019)

## Skills

**Programming Skills:** HTML, CSS, MYSQL, Python, Basics of Java, Django, Android Studio, React Native, React.js Flutter, React + Vite, Node.js

**Concepts:** Data Structures| Object oriented programming

**Soft Skills:** Team work, Adaptability, Time management, Networking

## Projects

- Secure Information Retrieval (IR) System using Machine Learning Techniques

Developed a Secure Information Retrieval (IR) System leveraging Isolation Forest for anomaly detection and Grey Wolf Optimization for enhancing query efficiency and threat mitigation. Ensured robust data access control and protection against unauthorized access using ML-driven techniques.

- Semi-Supervised Machine Learning Approach for DDOS Detection

Developed a model using semi-supervised learning techniques to accurately detect Distributed Denial-of-Service (DDoS) attacks in network traffic. Implemented feature extraction and anomaly detection methods to classify normal and malicious patterns with high accuracy using minimal labeled data.

- Brain Tissue Segmentation Using PSO with Hummingbird Optimization.

It is a Machine-Learning based brain MRI segmentation model using Particle Swarm Optimization (PSO) and Hummingbird Optimization. This approach improves the accuracy of segmenting White Matter (WM), Gray Matter (GM), and Cerebrospinal Fluid (CSF).

- An AI-Powered Attendance System with Face Mask Detection.

It is a Machine Learning-based attendance system that detects and verifies individuals while ensuring mask compliance. Used computer vision and deep learning for accurate face recognition and real-time processing, enhancing automation and safety.

- Navigating the Roads Ahead: Driving Forward with Aggregative View of Object Detection (AVOD) using Deep Learning Techniques

Developed a hybrid object detection model by integrating Faster R-CNN and YOLO architectures under the AVOD framework to enhance accuracy and speed for real-time object detection. Leveraged deep learning techniques to improve detection performance in complex road scenarios.

- Traffic Prediction for Intelligence Transport System Using Machine Learning

It is a machine learning based project which is used to detect objects and gives accurate information in such a way that it helps user to travel around feasibly.

- Aim Trainer Game

It is an AI based gaming development project which is used for training shooting target for beginners, it is based on python programming language.

## Work/Internship Experience

- STEMX India pvt limited

**Position:** Lead STEM Engineer (oct-present)

### Role & Responsibilities

- Lead and manage STEM-based educational programs focusing on robotics, AI, coding, and electronics.
- Design and develop hands-on STEM curriculum, workshops, and project-based learning modules for students.
- Train and mentor students in robotics kits, microcontrollers (Arduino), and programming concepts.
- Conduct STEM workshops, bootcamps, and technical training sessions in schools and institutions.
- Guide students in building innovative projects, prototypes, and competition-ready models.
- Collaborate with team members to improve STEM learning methodologies and educational content.
- Troubleshoot hardware and software issues related to robotics, sensors, and embedded systems.
- Support students in science fairs, hackathons, and robotics competitions.
- Evaluate student progress and provide technical guidance and feedback.

- **MH-Cognition**  
**Position:** Mobile Application Developer-intern(jan-jun)

**Roles & Responsibilities**

- Developed cross-platform mobile applications using React Native and Expo for Android and iOS platforms.
- Designed and implemented responsive UI components using modern styling frameworks such as Tailwind CSS.
- Integrated REST APIs to fetch, update, and manage application data from backend services.
- Implemented user authentication features including login, signup, and secure session management.
- Built and optimized navigation flows and screen routing to improve user experience.
- Debugged and resolved application issues to improve performance, stability, and responsiveness.
- Collaborated with backend developers to ensure seamless frontend–backend integration.
- Tested applications on multiple devices and performed bug fixing and performance optimization.
- Participated in feature development such as media integration, task modules, and dynamic content display.

- **CK&SONS Textiles**  
**Position:** Data Mining Intern(july-Aug)

**Roles & Responsibilities**

- Collected and processed large datasets related to sales, inventory, and customer purchasing patterns.
- Performed data cleaning, preprocessing, and transformation to ensure data quality and reliability.
- Applied data mining techniques to identify patterns, trends, and correlations in business data.
- Used statistical and analytical tools to support data-driven decision-making.
- Developed data visualizations and reports to present insights to management teams.
- Assisted in building predictive models for demand forecasting and customer behavior analysis.
- Worked with structured datasets using Python, Excel, and data analysis tools.
- Supported business teams by providing actionable insights to improve sales and inventory planning.
- Documented findings and presented results through technical reports and presentations.

## Certifications

- Acknowledged for completing course in English proficiency by Infosys SpringBoard.
- Secured course completion certificates from online education platforms like courser, codechef.
- Secured virtual internship completion in Amazon Web Service (AWS), and secured course completion certificate in Cloud computing, Machine learning.
- Secured certificate in Microsoft learn student ambassador.
- Participated in Technical and Non-Technical events organized by other colleges like MLRIT, BVRIT, MRCET.

## Achievements

- Successfully published papers of my projects in IRJMET, IJSREM.
- Secured course completion certificate in GEN AI course through GDSC platform.
- Secured Gold medal in English Olympiad exam which was organized by SOF in my schooling.

## Coding Profiles

|                        |                          |                           |                            |
|------------------------|--------------------------|---------------------------|----------------------------|
| Trailhead-mpradeepthi1 | Code Chef-pradeepthi2004 | HackerRank-pradeepthi2004 | GeeksforGeeks-pradeeptchek |
|------------------------|--------------------------|---------------------------|----------------------------|

## Personal details

**DOB:** 09-03-2004  
**Nationality:** Indian  
**Gender:** Female  
**Father’s Name:** Munganda Venkateswara Rao  
**Language known:** English, Telugu, Hindi, Korean

## Declaration

I hereby declare that the information furnished above is true and correct to the best of my knowledge and belief.
